LifeLine emergency resuscitation equipment

Saving minutes,
saves lives

 **BOC Medical**

PRO
LifeLine **O₂**

The development of light weight portable oxygen cylinders has helped to significantly improve patient care within the community. LifeLine is now an essential piece of kit in hundreds of GP surgeries, dentists, first responders and leisure groups throughout the UK.

The LifeLine Pro is designed for use by first aid trained personnel to provide a supplementary supply of medical oxygen at flow rates up to 15 litres per minute.

The CPR facemask provided not only eliminates direct contact with the casualty but linked to its oxygen supply can provide significantly higher oxygen concentrations than conventional mouth to mouth resuscitation.

For situations where a casualty who is still breathing requires oxygen, an adult non re-breathing mask is provided as part of this package.

Many additional items can be supplied with the LifeLine kit to tailor the product to your specific requirements. Items such as airways and bag-valve-masks are available to those trained in advanced resuscitation techniques.

On an annual basis, a BOC representative inspects the oxygen cylinder that forms part of the LifeLine Pro package. This ensures that the cylinder is in good working order and a work report is provided to the customer. The work report shows that the cylinder inspection has taken place and provides a record as an audit trail.

Benefits of LifeLine Pro

- Simple to use
- Fully portable resuscitation kit
- No capital outlay – just one annual service charge
- Oxygen cylinder is fully maintained by BOC on an annual basis
- Next working day refills in most areas (chargeable)
- Light weight cylinder with built in regulator
- Variable flow rates
- Reduces the risk of cross infection due to minimal patient contact.
- Additional items available to purchase to tailor the kit to your specific needs.

What's Included?

The unit is supplied in a purpose made carrier for portability and includes the following items:

- A lightweight oxygen cylinder with variable flow rates from 1 to 15 litres per minute
- One CPR facemask
- One length of tubing for use with the facemask
- One adult non re-breathing mask
- One pair of Nitrile gloves
- One clinical waste bag
- LifeLine signage.

Specifications

Lightweight portable oxygen cylinder CD with built-in regulator

Overall length	550 mm
Diameter	100 mm
Weight (full)*	3.2 kg
Minimum cylinder pressure	230 bar
Outlet pressure	4 bar
Gas Capacity (full)	460 litre
Flow rate (clickstop)	0 to 15 l/min
Duration at 15 l/min	30 mins

*Actual contents, dimensions and weight may vary from the figures indicated.
